Monthly Income:

Estimated monthly income: \$266,667

Debt-to-Income (aka DTI) ratio:

Pro Forma DTI is 53.4% (includes airplane loan payments)

Pro Forma Contractual Reserves in Months (aka Liquidity Ratio): 56 months

Barbie has ample contractual reserves of approximately 56 months (e.g. number of months Barbie can make payments using cash and cash equivalents (such as liquid marketable securities, although Mattel shares are restricted, we are giving 20% credit towards reserves)). The ratio considers the fact that \$1,000,000 will be used as a downpayment for the airplane loan reducing cash and cash equivalents from \$4,000,000 to \$3,000,000. Mattel shares at 20% credit additional \$5,000,000 in liquidity.
